**Telephone Garden City 2576**

March, 1947

We offer this fine list of carefully grown stock. It is superior because:

SOIL for potting was processed, nutrition added, Sterilized to eliminate weeds and insects in all stages.

MATERIAL taken from insect and disease free stock and healthy selected plants.

PROPAGATION was done carefully with planned and scientific methods.

AFTER-CARE was thoroughly followed through, control of insects — moisture and temperature.

**ALL THIS MAKES FOR SUPERIOR PLANTS**

Awaiting your valued orders.

<b>PHLOX</b>			
paniculata—Named varieties .....			25.00

All of the above Nursery Stock is bare root, nutrient processed and packed to encourage early root action. They may be planted with perfect assurance of success.

For twenty-five years importation of plants was at a minimum. Last Spring, we received many choice plants from Europe. Our shippers and our Nurseries are each within twenty-five miles of the respective ports and we were all able to handle our stock with a minimum loss. Our special processing and handling gave excellent results as reflected in many letters received from our satisfied clients.

For an indefinite and possibly short period, we are receiving direct from our relatives in Holland some of the best stock available there. We have bought up many items far in advance and will have the exclusive sale of some of the scarce items.

These plants have been carefully grown and have been packed and processed according to our instructions.
